The results in this summary represent the average (Mean) and standard deviation (StDev) of the ratings of students for the course indicated above. The item descriptions have been paraphrased. Please see the SEEQ instrument for the actual wording. NOTE: The standard deviation tells how the data is distributed (spread out) with respect to the average. In other words, the smaller the StDev, the closer your score is to the average or mean value of the student responses.

The results in this summary represent the average (Mean) and standard deviation (StDev) of the ratings of students for the course indicated above. The item descriptions have been paraphrased. Please see the SEEQ instrument for the actual wording. NOTE: The standard deviation tells how the data is distributed (spread out) with respect to the average. In other words, the smaller the StDev, the closer your score is to the average or mean value of the student responses.

What are the strengths and weaknesses of this course?

Comment

strength- like economics
weakness- hate mankiw

Good teacher but too fast moving

Strengths: well outlined, straight forward lecture
Weaknesses: can be a little boring but that economics

The strength of this course is its ability to provide a solid foundation to understanding economics. I feel there is no weakness to this course the way the professor taught it.

The instructor was well-versed in the subject, and was interesting to listen to in class. He made the subject interesting, and provided plenty of opportunities to get a better grade in the course. There were not any visible weaknesses in the course

strengths: learned a lot of valuable information
Weakness: Slightly difficult to take good notes

Covers a good breadth of information in the field of microeconomics

strengths were the intersecting topics and activities to get students involved. weakness was the continuous wordy phrases that confused students

This class was excellent. I like how we went over examples in class, but the tests were difficult.

a lot of information

Strengths: relevant, straight-forward
Weaknesses: boring

It felt like a high school course. Pace could have been faster.

I found micro to be a very interesting course that helped explain many economic issues in today's economy. I really enjoyed this class.

MicroEconomics is a stimulating, fun course. I was a big fan of the textbook used, Mankiw's 6th Edition MicroEconomics

Informative

Fairly easy to keep up

teacher could have been better

strength- funny
weakness- rambles

Great teacher

Strengths: genuine interests in all students

Professor Gallagher is one of the most amazing professors I have encountered at Fordham and one of the nicest people I have ever met. He is easily approachable and extremely helpful. One of my favorite things about Professor Gallagher is that he genuinely cares about his students, which I particularly find really encouraging. He has a great sense of humor and knows his subject well, I wish I could take him for all my future economics class because he gave me the confidence to major economics.

He was interesting and funny, and made the subject more interesting to listen to. He was also friendly and readily available for aid after class. Feedback on tests was a little vague and unclear, but it was well-explained in class.

Strength: Very receptive to students

Weakness: Notes are sometimes a little confusing

Lectures were difficult to understand. It would have been more helpful to go through the chapter with students from different examples besides the book. For example, making a personal powerpoint instead of putting what the textbook says on the board.

He did a good job of explaining material, but it would have helped to have PowerPoint slides. It's difficult to take notes entirely by ear. But overall, he was very kind, and I enjoyed his class

strengths were his positive attitude and understudying of specific students needs. weakness is speed of classroom

He was excellent!

he's a nice guy

he should stop teaching based solely on the textbook and have a more original lesson plan

Strengths: friendly, fair, hardworking

Weaknesses: boring way of teaching, sometimes gets lost or confused

It's hard to judge because this class was so basic, but an overall good professor.

I really liked Professor Gallagher. He was a very fair teacher and grader. Sometimes his lectures got a little boring, but overall I'd recommend him to anyone taking economics. He simplified many complex ideas and made them easy to understand.

Prof. Gallagher is an enthusiastic, funny, knowledgeable professor. I have learned at least three times as much about the subject of Economics than I did in last semester's MacroEcon. He is always helpful, jovial, and gives lots of helpful tips and acronyms to study with. I can understand why he has such an excellent reputation among students at Fordham.

Easy to understand

Great person

What are the strengths and weaknesses of this course?

Comment

Covers microeconomics theory decently, but insults the intelligence a bit. Needs more math.

Strengths- fair grading / good extra credit

Weaknesses- sometimes it is dragged out

The material itself is not very exciting, but the professor makes it as delightful as he can.

The textbook is very dense so it is hard to go over all the material in the semester.

The class went according to the syllabus and we were never thrown any curve balls. The only weakness I can think of is that the subject is a bit dry and maybe use a few more methods, like the snickers and the drawing, in more of the classes to liven it up a little.

strengths - good pace, approachable instructor

This course was interesting however there was an immense amount of information that needed to be learned in a very short duration of time.

The weakness of this class is that the first half of it was exactly the same as macroeconomics and for those who have taken it already, it was a waste of time.

Slightly boring, material sometimes confusing but has real-life applications. Fair for an intro course

Done in line with the book is a strength. Weakness= class itself was not too vocal. Not necessarily a teaching problem

Comment

Nice guy, experience in finance. Seems a bit bored with subject sometimes. However, this is more due to general apathy of class than to personal disinterest.

He cares about the class, yet sometimes he forgets what he's talking about.

Very humorous and has a genuine care about his students.

Funny good teacher

He goes over the material very fast and sometimes moves too quickly. I wish we spent longer on some material and less on less important stuff. Overall though, Prof Gallagher is a funny teacher and quite engaging during class.

strengths - very nice and supportive teacher, always willing to help students who do not understand a topic explained in class

The instructor taught what he was supposed to, but was not very engaging.

Extremely nice, cares about students

sometimes boring, needs to give better powerpoints

Good at explaining things
